### ABOUT FLEETPROS

FleetPros is a non-profit industry association which strives to support fleet professionals through education, networking, and resources. FleetPros members have the opportunity to meet frequently with other fleet management professionals to exchange ideas and find solutions to common problems. The association also enjoys strong support from our associate (supplier) members. These valued associates keep FleetPros fleet members informed about the latest innovations and product developments. In return, suppliers are provided with a positive environment to introduce their products and services and meet prospective clients.

FleetPros was organized in 1976 by a group of fleet management professionals seeking to share their experiences and solve common problems. It has since grown to become one of the most progressive and innovative organizations of its kind. The Association currently has five chapters (Arizona, Colorado, Nevada, Texas, and Utah) which include most of the surrounding states and represent approximately 1100 fleet professionals and suppliers.

FleetPros chapters conduct local meetings quarterly with professional speakers, panel, and round table discussions on a wide variety of topics. Annually, FleetPros conducts a conference (FleetCon) for fleet professionals, which includes management and technical training sessions and an equipment exposition.

### TARGET AUDIENCE

FleetPros actively works to ensure that appropriate educational programs are available to fleet professionals for their on-going professional growth and development. We provide these opportunities at both the Chapter and Association levels through quarterly chapter meetings and our annual conference, FleetCon. *Proposals submitted to sell a product are not acceptable.*

### SELECTION CRITERIA

The selection process follows a rigorous review of every proposal submitted. The Program Selection Committee strives for a diverse and well-balanced conference. For the 2025 Conference a special effort will be made to include speakers of both General and Advanced leadership roles in the Fleet community, and programs that offer solutions that can be implemented by attendees.
